

APPENDIX H

Extrapolation on the Number of Child Abuse Victims

What follows is an extrapolation of the numbers of victims and perpetrators for Britain, Canada and the United States based on the fact that (1) 1,006 alleged child molesters were recorded by Watchtower in Australia between 1950 and 2014, and (2) these 1,006 alleged perpetrators are said to have abused at least 1,800 victims. Publisher numbers for all four countries are based on *Yearbook* figures
