Jehovah's Witnesses

are well-meaning people. However, their leadership imposes laws and guidelines that endanger their members, both emotionally and physically. These include:

- Preventing members from voicing any disapproval against the religion's teachings and practices, and encouraging family members to heartlessly shun any who do
- Coercing members and their children to refuse medical treatment if this includes whole blood transfusions, putting many lives at risk
- Failing to protect children against paedophiles, who are automatically assumed innocent if their abuse was not witnessed by someone other than the victim!

Despite this deplorable treatment of members, each year Jehovah's Witnesses receive millions of pounds in "gift aid" from the HMRC, *in addition* to enjoying a "tax exempt" status. If you find this immoral, please visit the following web page <http://epetitions.direct.gov.uk/petitions/29949> and sign the petition! If 100,000 signatures are collected, the matter will be debated in parliament.

Make sure that Britain's charities serve in the public interest, and not their own interest!

For more information, visit www.jwsurvey.org. Thank you!
